

Using Expressions & User Defined Functions Workshop

What are expressions and user defined functions? At a basic level it is a form of programming that allows the user to write custom logic for selectivities, data manipulation or as needed. During this class we will cover the most popular expressions used by other customers and supplied by Customer Support. Upon completion of this 5 hour course you will be able to manipulate data by using one or more expressions and user defined functions.

COURSE CONTENT

- » **What are expressions?**
- » **Using expressions**
- » **Using Expression Builder**
- » **Building expressions by hand**
- » **Review these expressions**
 - * Word
 - * Left
 - * Right
 - * Length
 - * Char
 - * Pos
 - * Substr
 - * IF
 - * Switch
- » **Combining expressions**
- » **Creating & using User Defined Functions**
