

Mail Manifesting Option

BCC Mail Manager™ Software

Variable mailings made simple and affordable

“The more things change, the more they stay the same.” If only that applied to mailings with pieces of variable weights and thicknesses. Without an easy way to reconcile such jobs with the automated USPS® manifest mailing system, any postal discounts those mailings might deserve will certainly change—and not for the better.

That’s why it’s time to consider Mail Manifesting from BCC Software. This option for BCC Mail Manager™ organizes and documents your variable mailing jobs, ensuring streamlined production and proper postal discounts. Available for both Standard and First-Class™ mailings, you have the flexibility to manage both types with one solution. First-Class Letter manifests are certified through USPS’s MAC Batch™ program.

Both letters and flats are supported for First-Class and Standard Mail® commingling—even BPM parcels can be manifested as an option to our BCC Mail Manager Full Service™ software.

After BCC Mail Manager presorts your list, the Mail Manifesting option generates manifest keylines on each piece and prints a USPS-required manifest report.

The results: a smoother trip through the postal system for your mailing, and optimal postage savings for you or your clients. Don’t let complex mailings upset your bottom line. Keep it simple with Mail Manifesting for BCC Mail Manager.

HOW CAN WE HELP?

BCC Software prides itself on our in-house, local customer support team, who are all USPS Mailpiece Design certified. Need assistance? Never hesitate to give us a call.
