

Palletization Option

BCC Mail Manager™ Software

Enhanced functionality for increased production

Palletizing is indispensable for high-volume mailings, but without complete presorting capabilities, its value doesn't stack up. Add power to your pallets with BCC Software's palletization options for BCC Mail Manager™.

Many providers offer one or two pallet-presort alternatives. Look to BCC Software for total palletization solutions — support for First-Class Mail® pallets with CSA support, tray-, package-, and sack-based sorts for Standard Mail® and Periodicals. No matter how your pieces are gathered for pallet-based shipments, these products let you handle them with ease — increasing your mailing efficiency and saving you time and money.

BCC Mail Manager's palletization options include proper sortation of the mail, as well as the Intelligent Mail® container label.

The palletization options in BCC Mail Manager are much more than just putting mail on the pallet — with features such as custom pallet weights, pallet balancing, and placing heavy trays at the bottom of a pallet, you get total control over your mail production.

Whether you need only one palletization option or the complete suite, you'll know your mailings are arranged in an order that maximizes delivery speed, labor economy, and transportation ease. Mailpieces even receive less handling, for improved condition when they reach their destination.

YOUR FULL SERVICE SOLUTION

Palletization functionality is included in BCC Mail Manager Full Service™, BCC Software's premier solution for top-tier mailers. BCC Mail Manager Full Service offers greater processing speed, exclusive options, and a comprehensive features set.

KEY FEATURES

- » First-Class Mail palletization with CSA support
- » Reduce material handling on mailing jobs to decrease labor costs
- » Label pallets and rolling stock properly for trouble-free mail entry
- » Optimize mail for drop ship handling
