

## Mail.dat

BCC Mail Manager™ Software

## Handle variable mailings with flexibility and affordability.

The USPS® *PostalOne!*® system eliminates the need for hard-copy postal forms, and the newly enhanced Mail.dat™ option for BCC Mail Manager™ lets you take advantage of *PostalOne!* like never before.

Mail.dat is also the best way to provide information to logistics providers about your mail, making shipment planning easy.

The Mail.dat option for BCC Mail Manager and included with BCC Mail Manager Full Service™, uses this industry-standard format to streamline USPS reports into ultra-compact electronic data that replace traditional hard copy documentation such as the Qualification Report, Postage Statement, and Manifest reports, among others.

Used in conjunction with the USPS *PostalOne!* client, the files provide an easy gateway to enter mailing information. And the new updating function dramatically increases flexibility by allowing for last-minute changes in piece weight, job status details, or appointment information. BCC Mail Manager users can now submit the most up-to-date job details without having to use costly third-party Mail.dat packages.

### YOUR FULL SERVICE SOLUTION

The Mail.dat option is included as a standard feature in BCC Mail Manager Full Service, BCC Software's premier solution for top-tier mailers. BCC Mail Manager Full Service offers greater processing speed, exclusive functionality, and a comprehensive feature set.

### FEATURES

- » Updating feature provides greater job-detail accuracy with no additional software packages required
- » Replaces cumbersome paper-based USPS reports
- » Maintains consistent data file formats
- » Easy connectivity to *PostalOne!* system
- » Saves time, resources, and money
- » Supports First-Class Mail®, Standard Mail®, Package Services, and Periodicals
