

## Network Option

BCC Mail Manager™ Software

## The one solution for advanced database sharing capabilities

As your business grows, so should your access to your mail preparation software. The Network option for BCC Mail Manager™ allows multiple workstations to access a single software installation, for greater efficiency, productivity, and economy.

The option lets you create user profiles that specify access privileges on an employee-by-employee basis. Your lists remain password protected to ensure additional security, and the user history log helps administrators keep an eye on how the lists are being used. Lists can be stored anywhere on the network for easy access by authorized users. When multiple users access the same list at the same time, records and files are automatically locked to prevent any accidental overwriting of changes.

A single set of ZIP + 4® files can be stored on the network, or on each computer: you choose. You can even access any saved BCC Mail Manager work from any part of the network. Best of all, your BCC Mail Manager license agreement is seat-based, not user-based, so multiple users can access a single workstation without hassles. Share lists—and increase productivity—more easily and affordably than ever before.

### FEATURES

- » Specify access privileges
- » Secure list monitoring
- » Master file access control
- » MID Management across user installations
- » Centralized access for maximum mobility
