

Track N Trace

Data Marketing Services Solution

Intelligent mailpiece tracking for a smarter and more effective business

USPS® Informed Visibility® provides valuable mailpiece information to efficiency-minded mailers. Track N Trace®, BCC Software's mail tracking service, channels this technology to provide unbeatable mailpiece intelligence and reporting.

Offering extremely powerful reporting capabilities, Track N Trace leverages mailpiece scan data for both outbound and inbound mail. These reports help you and your customers gain visibility into the mailstream, driving better performance across business operations.

Monitoring the progress and delivery of your outbound mailings helps you improve delivery effectiveness and timing. Monitoring the progress of your inbound mailings gives you notice of incoming Business Reply mail so you can optimize your operations and predict cash flow.

The Track N Trace service is available to both BCC Mail Manager™ customers and non-customers alike.

TRACK N TRACE DELIVERY CONFIRMATION (OUTBOUND MAIL)

Track N Trace collects step-by-step delivery information from postal facilities on your outbound mailpieces' delivery path, which is stored on a secure website. Reports are generated or downloaded at your convenience, and allow you to monitor the progress of your mailpiece so you can gauge the delivery effectiveness and predict future performance.

From the power to identify weak links in the delivery chain to the ability to predict mailstream patterns, the information revealed by mailpiece tracking can improve your business—and the more specific your data, the better. Track N Trace uses state-of-the-art USPS® Informed Visibility technology, ensuring the most comprehensive and up-to-date delivery details are available when you need them.

TRACK N TRACE ORIGIN CONFIRMATION (INBOUND MAIL)

Use TNT Origin Informed Visibility to improve the predictability of inbound Business Reply mailpieces for your First-Class™ mailings. Utilizing the advanced reporting technology from BCC Software, TNT Origin Informed Visibility tracks First-Class Business Reply pieces as they are scanned on their way back through the USPS to your business. This visibility can be used to predict cash flow with more certainty, plan collection efforts, streamline inventory management, improve customer service experience, and adjust staffing levels.

TRACK N TRACE REPORTING

Our powerful reporting engine allows you to conveniently check up on the mailstream progress of any job. Updates are posted multiple times daily to BCC Software's secure servers. Simply schedule reports to be downloaded or emailed to you automatically, or view them manually on our secure website.

A wide variety of download formats for your Track N Trace reports provide maximum presentation flexibility and detail, helping you quickly understand what pieces were scanned and at which locations. Additionally, you can customize your reports by exporting the data from Track N Trace and importing it into your favorite reporting tool.

TRACK N TRACE RESELLER OPTION

Become a Track N Trace reseller with a branded website that allows you to provide mail-tracking functionality directly to your customers.

HOW CAN WE HELP?
